

ABSTRACT

1
2 The present invention relates to methods of preventing or inhibiting
3 the growth of *Helicobacter* through the use of a composition that comprises
4 a glucosinolate, an isothiocyanate or a derivative or metabolite thereof. The
5 present invention also relates to methods of preventing or treating persistent
6 chronic gastritis, ulcers and/or stomach cancer in subjects at risk for, or in
7 need of treatment thereof.
